PROJECT TITLE AND EXPLANATION OF CHANGES VADEQ Community-Scale Air Toxics Ambient Monitoring <p>This amendment adds federal funds in the amount of \$247,453.00 to fully fund this award and updates the award conditions.</p> <p>Page 2 of this award shows a \$1.00 decrease to Recipient Contribution and a \$1.00 increase to State Contribution, thus canceling one another. This is a temporary workaround solution as EPA implements a new national grants system.</p> <p>This amendment will continue to support the Virginia Department of Environmental Quality (DEQ) Office of Air Quality Monitoring (OAQM) for a Community Scale Air Toxics Monitoring project for the Southeastern (Tidewater) Area of the Commonwealth of Virginia. This project is intended to characterize the ambient concentrations of air toxics metals and perform corresponding air quality and health risk assessments for two Tidewater communities: the Lamberts Point Community (LP) and Southeast community (SE) located in Norfolk and Newport News, respectively. This project is designed to develop a local air quality characterization in these communities and perform an air quality and a health risk assessment for air toxics metals. The results of this characterization and the air quality and health assessments will inform future DEQ Strategic Plan objectives to improve air quality and community engagement in underserved communities.</p>
